

B is a subset of Species A) “formed in the interior of elongated tubular members.” Moreover, it is unclear why Figures 2 and 17 are assigned to different species based on the number of reactor chambers.

All of the claims fall within Species A (each of the claims includes embodiments with at least two elongated reactor chambers) and all of the claims are generic to Species A and B (because Species B is a subset of Species A).

If the Examiner has any questions or concerns, the Applicants encourage the Examiner to contact the Applicant’s representative, Bruce Black, by telephone to discuss the matter.
